Allowable Subject Matter

1. Claims 1-10 are allowed.

The following is an examiner's statement for reasons for allowance.

2. Claims 1 and 6 are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly teach or fairly suggest distributing a number of reference clocks across a packet network by providing a basis clock in a master node and one or more slave nodes, encoding multiple reference clocks with respect to the basis clock in the master node to generate numerical information describing the reference clocks in relation to the basis clock in the master node, synchronizing the basis clock in each of the slave nodes to the basis clock in the master node using time-stamped synchronization packets and recovering reference clocks at the slave nodes using the numerical information describing the reference clocks in relation to the basis clock in the master node.
